

TERRAGUIDE[®] Food

The state-of-the-art mobile flooring system.

The clean working and storage platform for the food industry

Being in contact with foods, a maximum hygienic standard is required. The easily cleanable flooring system TERRAGUIDE[®] Food is designed exactly for those requirements. The mat elements with secure closures can very easily, safely and swiftly be connected and later removed for cleaning. For that reason working and storage platforms are effortlessly installed by a single person without additional tools in a modular system 25 x 25 cm.

TERRAGUIDE[®] Food is fully approved in the gastronomic and food processing industry- proofed by an external hygienic expert report.

The floor - due to the non-slip surface is both safe to walk on, kind on joints and therefore extends a comfortable working day.
